JOURNAL OF PROCEEDINGS, - - - - -	page ix
REPORT, - - - - -	xviii
INTRODUCTORY LECTURE, by WILLIAM SULLIVAN, -	1

Definition of intelligence, 3—of happiness, 4—necessity of educating the young, 4—what the proper education of an American youth should comprise, 6—the importance of attention to the physical comfort of the young, 6—schools uniting intellectual pursuits and mechanical labor, 8—education defective in not teaching how to live and for what to live, 9—cause of the error and a remedy suggested, 16—importance of a knowledge of our political institutions and of the duties and rights of a citizen, 22—slavery, 27—other dangers and abuses to which a country enjoying perfect political and religious freedom is liable, 32—means of counteracting these liabilities to abuse, 33—objects of encouragement, 33.

### LECTURE I.

ON THE IMPORTANCE OF A KNOWLEDGE OF THE PRINCIPLES OF PHYSIOLOGY TO PARENTS AND TEACHERS. By EDWARD REYNOLDS, M. D. - - - - -	39
----------------------------------------------------------------------------------------------------------------------------------	----

Attention of the present age to education, 41—causes of alarm to the physiologist in the exclusive attention to the mind, 42—ill health not a necessary consequence of study, 43—disease induced by overaction of the mind in early life, 44—union and sympathy between the body and the mind, 46—definition of physiology, 48—I. The brain the organ of thought, 49—II. It is subject to the same laws, as regulate the functions of the other organs, 49—III. Predominance of the brain and nervous system, in infancy, childhood and youth, 51—IV. Of the blood vessels supplying these organs,

515068

51 — V. Softness of the brain at this period, 51 — VI. Causes of alarm in this early preponderating influence of the brain and nervous system, 53 — improper regulations and management in schools, 54 — I. Physiology enables us to comprehend the mysteries of digestion, 62 — II. The sympathies between the brain and the stomach, 62 — III. Predominance of the digestive function at its commencement, 63 — evils of violent exercise and exertion of the mind immediately after a full meal, 63 — respiration, 64 — exercise, 67 — connexion between the moral and physical man, 67.

## LECTURE II.

ON THE CLASSIFICATION OF SCHOOLS. By SAMUEL M. BURNSIDE. - - - - - 71

Objects of education, 73 — changes in our physical and intellectual nature owing to education, 74 — diversity of opinion in regard to our moral nature, 75 — moral nature a proper subject of school education, 76 — imperfections of the existing classification of schools, 76 — cause of the neglect of moral education, 78 — education too exclusively intellectual, 79 — consequences of this error, 80 — exemplified, 82 — remedy in the proper gradation of schools, 83 — infant schools, and the manner of conducting them, 84 — well suited to moral instruction, 88 — primary schools, 89 — English grammar schools, 89 — classical and high schools, 90 — schools for blacks, 91 — for apprentices, 92 — Sunday schools, 92 — cheapness of schools, according to the above arrangement, 93.

## LECTURE III.

ON PRIMARY EDUCATION. By GARDNER B. PERRY. - 95

Influence of circumstances in forming the character, 97 — division of the subject, 100 — neither public nor private education should be exclusively adopted, 101 — advantages of domestic education, 101 — every system should be regulated with reference to the domestic institution, 103 — good effects of domestic education, upon the parent, 105 — asylums, 105 — domestic education inadequate of itself to fit men for the business of life, 107 — children to be brought early in contact with the world, 109 — fitness of public schools for this purpose, 109 — defects in our school houses, 114 — studies proper to be pursued, 115 — selection of books; 115 — mechanical helps, 119 — distinction between filling the mind with facts, and strengthening and improving the understanding, 120 — the principles of securing attention to study and order, 121.

## LECTURE IV.

## ON EMULATION IN SCHOOLS. By LEONARD WITHINGTON. 131

Usage of language, 133 — innovations of metaphysicians on language, 135 — various senses of the word emulation, 137 — good sense of the word, 139 — objections to emulation examined, 142 — not inconsistent with the gospel, 144 — the use of it not necessarily productive of excesses, 146 — error in applying the principle of emulation to minds which least need it, 148 — not the only principle to be appealed to, 149 — error in the conduct of education in our large cities, 150 — danger of inconsiderate innovations, 151.

## LECTURE V.

## ON THE BEST METHOD OF TEACHING THE ANCIENT LANGUAGES. By ALPHEUS S. PACKARD. - - - - 153

What is implied in the acquisition of the ancient languages, 155 — the same principles to be pursued in languages as in other branches of knowledge, 157 — the best course, that which nature points out, 158 — the natural course considered, 158 — two ways of presenting general truths to the mind, 160 — that which is to be pursued in the languages, 161 — method formerly pursued, 163 — objections to the inductive method considered, 164 — different influences of the inductive and of the old method, on the intellectual habits, 167 — practical details of the course recommended, 168 — translating for the pupil and directing his attention to the nature and peculiarities of the language, 170 — analysis, 171 — writing exercises and double translations, 171 — reviewing, 172 — reading audibly, 174 — committing to memory portions of the language, 174 — Hamiltonian system, and that of the Hazlewood school, 175 — objections to interlinear translations, 176 — interpretation of language, 178 — necessary helps, 179 — course pursued at preparatory schools and colleges faulty in the selection of text books, 180 — objections to books of extracts, 181.

## LECTURE VI.

## ON JACOTOT'S METHOD OF INSTRUCTION. By GEORGE W. GREENE. - - - - - 185

Choice of text books, 188 — pronunciation, 188 — the epitome, and the manner of learning it, 189 — examination, 190 — study of the grammar, 192 — narration, 194 — imitation, 195 — composition, 195 — translation, 198 — repetition, 199 — constant reference to the epitome, 200 — correction, 201 — this method applicable to all departments of study, 202 — habits of study and action which this method has a tendency to form, 203.

## LECTURE VII.

## ON THE BEST METHOD OF TEACHING GEOGRAPHY. By W.

C. WOODBRIDGE. - - - - - 209

Objects to be attained in this study. Advantages to the traveller, merchant, &c, 209 — to others — comparison of the ignorant and well informed. Expansion of mind produced, 211 — elevation — foundation of Geographical knowledge, 212 — elementary ideas, 213 — danger of mechanical study. — Observation of nature, 215 — measurement — drawing maps, 217 — transition from visible to invisible objects — astronomy, 219 — study of maps, — globes, 222 — models, — maps in relief, — profiles of a country, 224 — engravings, figures and emblems, on maps, 226 — questions, physical geography, outline and skeleton maps, 229 — importance of comparing, temperature and productions, 232 — inhabitants of the earth, — natural families, — their institutions, 234 — artificial divisions, — statistics, — utility of classing numbers, 237 — preliminary lessons in political geography, — importance of leading the pupil to the Creator of the world, 239.

## LECTURE VIII.

## ON THE NECESSITY OF EDUCATING TEACHERS. By SAMUEL

R. HALL. - - - - - 241

The want of qualified teachers and of seminaries for educating them, 243 — lively interest of the public in other subjects, 244 — no adequate reason to justify indifference in this, 245 — for other professions and arts preparatory discipline is considered essential, 246 — our desire to employ those of talents and skill in other callings, 248 — error of the supposition that there are already schools enough, 249 — statistics corroborative of deficiency, 249 — improbability of having good teachers unless they are educated for the profession, 251 — remedy for the present evil, 254 — existing seminaries in which teachers are educated, 255 — facts further illustrative of the want of adequate instructors, 256 — objections considered, 257.

## LECTURE IX.

## ON THE ADAPTATION OF INTELLECTUAL PHILOSOPHY TO

INSTRUCTION. By ABIJAH R. BAKER. - - - 261

Importance of the subject, 263 — definition of Intellectual Philosophy, 264 — The intimate relation between this philosophy and the art of education, drawn, — I. From the nature of the truths of this science and the ultimate

object of education, 265 — II. From the successes and failures of different teachers, 268 — III. From the fact that school committees, trustees, &c, recognise in practice the principle contended for, 269 — IV. From the aid which metaphysics afford the teacher 271, — First, this science will enable him to discover the wants of his pupils, 271 — Secondly, a practical knowledge of it will assist him in the selection of studies proper for his pupils, 276 — Thirdly, it enables him to direct students to a proper method of prosecuting their studies, 283 — Lastly, the advantage of this study to the teacher in the communication of his own knowledge, 285 — mode of acquiring the science, 287.

## LECTURE X.

## ON THE BEST MODE OF TEACHING NATURAL PHILOSOPHY.

By BENJAMIN HALE. . . . . 289

Mode of teaching to be varied according to the capacities and acquirements of the pupils, 291 — this science unsuited to children, 292 — nature of the science, 292 — two kinds of proof, 293 — method to be pursued without the aid of mathematical science, — I. Experiments must be made accurately and so as to amount to proofs, 293 — II. Numerical solutions, 294 — III. Questions which do not admit of numerical solutions, but yet teach the learner to think, 297 — tendency of the present age to level science to the meanest capacities, 298 — this science necessarily allied to mathematics, 299 — moral influence of the study, 300 — should be pursued as an exact science, — 301 — not an unattractive study pursued in the way recommended, 302 — means of making the study, rigorously pursued, interesting to students, 303 — whether instruction should be given from text books, or lectures, or both, 305 — neither to be dispensed with, 306 — in what manner they should be combined, 308.

LIST OF OFFICERS. . . . . 310

CATALOGUE OF MEMBERS, . . . . . 312
